Backend Cinematic Universe (Hinglish Fun Version)

1. HTTP - Devtaon ki Language GET matlab "bhai dekh ke aa", POST matlab "naya bna de", PUT matlab "poora replace kar de", PATCH matlab "thoda sa touch-up", DELETE matlab "uda de".

2. REST API - Rajya ke Doot Ye woh log hain jo server aur client ke beech messages pahuchate hain. Uniform: JSON. Attitude: Fix routes only.

3. MVC - Bollywood Movie Team Model = Scriptwriter, View = Actors, Controller = Director. Poora system ekdum filmy style.

4. Node.js - The Fast Warrior Kabhi sota nahi. 1000 kaam ek saath karta hai. Async Await ka jadugar.

5. Express.js - Highway Engineer Routes, middleware, signals… sab road iske. Aap bas code likho, yeh smooth traffic chalata hai.

6. Databases - Do Shehr **MySQL:** Bilkul sahi rules, relations, strict raja ka shaher.
MongoDB: Bindass jungle jahan log apne documents mein aish karte hain.

7. Authentication - Security Guards JWT pass, Refresh Token VIP pass, Bcrypt password ko unreadable bana deta hai.

8. Caching - Memory Genie Redis: Ek baar bata diya toh yaad rakhta hai instant.

9. Queues - Backend Post Office Emails, invoices sab queue mein daalo, backend silently process karta hai.

10. Cron Jobs - Time Wizards Exact time par kaam execute karne wale jadugar.

11. WebSockets - Gossip Queens Real-time baatein, chats, notifications… bina rukke!

12. File Upload - Luggage Team Multer luggage pack karta hai, S3 storage mein rakh deta hai.

13. Payment Gateways - Rajya ki Treasury Razorpay, Stripe… sab paisa handle karte hain. Webhook = "bank ka update aa gaya".

14. API Integrations - Dusre Rajo ke Raajdoot Google, WhatsApp, Shopify… sabke saath friendly relations maintain karte hain.

15. Deployment - Space Launch Team AWS EC2, NGINX, PM2… inke bina app upar nahi jaata (LIVE).

16. Final Boss - Real Projects E-commerce, LMS, Chat app, CRM, Payout system—ab aap kuch bhi bana sakte ho!

– Made specially for Ajay Jain ■■
